

ABOVENET Boston, MA

Lamb provided Planning, Design and Construction services for this 8,000 s.f. Point of Presence (POP) facility for Metromedia Fiber Network, a leading provider of end-to-end optical network solutions. The secure space is equipped with redundant mechanical and electrical systems and a 4800 amp DC power plant.

The renovated area is in an existing building with three fiber optic feeds that provide telecommunications and co-location equipment for optical network solutions and internet connectivity.
