

EPHRATA NATIONAL BANK Blue Ball, PA

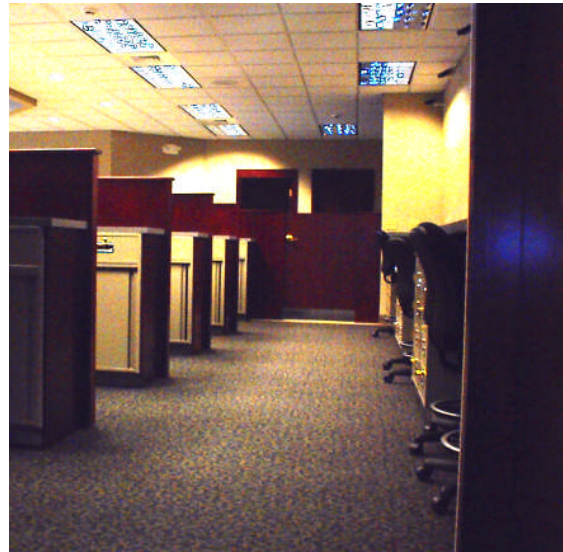

Lamb provided Planning, Design and Construction Services for this 6,000 s.f. full service branch located in Blue Ball, PA.

The project included site evaluation, building concepts, and the complete land development process from plans through township approvals.

Lamb's design staff worked with the bank to create a floor plan and level of fit-out aligned to the targeted customer base. This included a greeter station to assist customers, customer service offices, a dedicated conference room, and offices for the money management services.

The bank's functional areas—main tellers, drive-thru tellers, safe deposit boxes vault and coupon booths—were situated for maximum efficiency and customer convenience.
