

WEILER CORPORATION

Cresco, PA

Lamb planned, designed and built a 34,500 sf manufacturing/warehouse addition, a 58,400 s.f. distribution warehouse addition, and a 16,775 sf distribution center mezzanine/office expansion.

The newest addition is the 26,770 s.f. two-story office building, the focal point of the Weiler campus. The building is characterized by a front glass wall that invites visitors into the first floor lobby and provides natural light to the boardroom.

The walls, roofing and window systems are highly thermal efficient allowing for greater energy savings.
